UMBRELLAS

Our wooden and “Bravura” range introduces you to the elegant and sophisticated design of the new modern parasols. The Bravura is the latest addition to our aluminium range creating a unique style as it comprises a combination of an aluminium structure, solid stainless steel fittings and wooden components. These ranges are fashioned in a myriad of shapes, colours and sizes offering exciting features and technical advantages, making it the preferred product in modern quality shade design. It will transform any area to look especially attractive.

The tilt mechanism is constructed from solid brass or stainless steel fittings, keeping them maintenance free and able to withstand all weather conditions.

All wooden components are made from sustainably managed, renewable plantations.

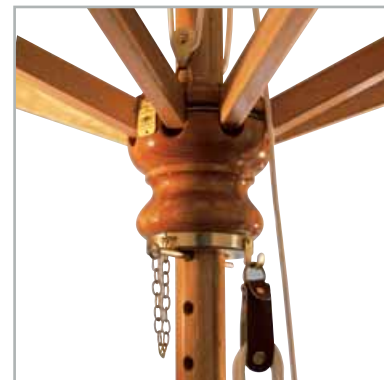

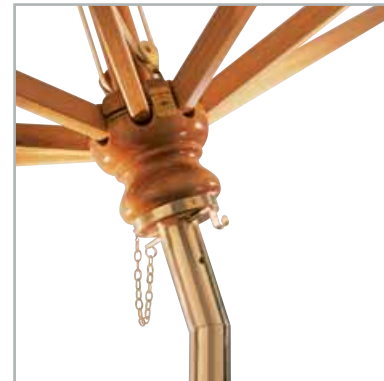

All fittings used are made from highest quality materials.

Umbrellas

Shades of elegance

The canopy comprises of a fully removable canvas: - 100% Dralon acrylic, Teflon treated and UV protected or - solution dyed canvas.

There is a choice of 14 different colours.
(please note solution dyed colours differ)

BASES : Slabs, stands, and underground bayonet

We offer a large variety of bases, plates and tubes in different sizes and weights to match the size of the parasol and provide maximum stability.

Slabs

35kg - small • 55kg - medium • 75kg - large

All available with a pebble, terracotta or concrete finish.

Stands

small - dia 38mm pole • medium - dia 48mm pole • large - dia 60mm pole
Available in hot-dipped galvanised, powder coated or stainless steel.

Tubes & underground bayonet stand

Made from solid stainless steel.

48 x 270 / 48 x 400

57 x 270 / 57 x 500

70 x 270 / 70 x 500

Leather pockets

Leather pockets, professionally tanned and treated for weathering, add an attractive finish to all umbrellas in this range.

Finial

Situated at the top of the umbrella, a wooden finial handcrafted and finished to detail, comes in three different sizes. (small, medium, large)

Ventilation hood

Specially engineered ventilation hood, which will capture the breeze and create stability in gusty winds.

Coverbags

Our customers have the option of choosing a zipped coverbag to protect the umbrella when not in use. Coverbags can be offered in heavy duty pvc or acrylic dralon.

Tilt

We have created the ultimate shade solution. The easily adjustable tilt mechanism with our umbrella's enabling three to four tilting positions now ensure that while the sun moves you don't, providing shade throughout the whole day.

Plates

A new concept design for use under low braced tables. Plate and tube powder coated in a variety of colours or solid stainless steel.
